Lucía Cristóbal Marín has a degree in Fine Arts from the Universidad Complutense of Madrid, is Interior Architect from the Universidad Politécnica of Madrid and M.A. Architect from the Akademie der Bildenden Künste in Munich with Professor Carlo Baumschlager. During the last eight years she has developed her career in the field of arts, where she has worked on painting, video art, installation, image, and architecture. He has participated in various exhibitions, as well as in different scholarships and artistic residencies in Europa. Her artistic activity has been recognized with awards.

Lucía Cristóbal Marín is a visual artist who works with intangible information from the Internet and with the viewer, as well as with digital information and languages (social networks, the value of digital semiotics or viral identity...). Her work deals with the seemingly disconnected information on the Internet, questioning the connected society. She explores how we consume information from the Internet and its meaning. The works experiment with the juxtaposition of extreme fields where the tension between one or several concepts is sought. These works are devices where the viewer is reflected and with which they can interact. Everything has to be quickly metabolized. The myth is no longer Marylin, but a youtuber.

In 2014 she has founded the artistic group TondoSmiling, a duo formed by Lucía Cristóbal Marín and Dr. Ramón López de Benito. After the realization of different documentaries, TondoSmiling orients its visual production towards video art and installation, with the creation of art installation, which experiment with the possibilities of video, images, painting, architecture, and new technologies. The research addresses the aesthetic experience of the image as a myth in the post-internet era. The work raises the debate on the new paradigms of the image and the connected society.
